Abstract—The abstract goes here.

I. INTRODUCTION

Há uma demanda por sistemas capazes de estimar a densidade de uma partícula biológica para especificação da natureza da partícula e diagnóstico da condição de saúde do paciente.

- O sistema acústico é mais barato?
- O sistema acústico pode vir a ser completamente automático?
- O sistema acústico pode vir a ser operado remotamente?

II. SoA

A. In SIBGRAPI

- Point Spread Function [2]. Fig. 4 is similar. Uses Richardson Lucy and Gerchberg-Papoulis restoration methods. Use it with phantom image for comparisson.
- "Focus".

[?]

III. METHODOLOGY

??

A. Particle Dynamics

B. Optical Model

C. Surface fitting using Tensorflow

IV. RESULTS

V. CONCLUSION

The conclusion goes here.

ACKNOWLEDGMENT

The authors would like to thank...

(a) Case I
